**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

## Office Action Summary

**Application No.**

10/579,594

**Applicant(s)**

VINAS ET AL.

**Examiner**

Taylor Victor Oh

**Art Unit**

1625

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 17 May 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-22 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☐ Claim(s) \_\_\_\_\_ is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☒ Claim(s) 1-22 are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☒ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

**Attachment(s)**

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO/SF/ICE)  
Paper No(s)/Mail Date \_\_\_\_\_
- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date \_\_\_\_\_
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: \_\_\_\_\_

### ***The Lack of Unity***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-22 are drawn to the following compounds of formula (I), the process of making them and their use as disclosed below :

- X represents a halogen atom selected from chlorine, bromine and iodine
- A is selected from any of the moieties corresponding to general formula:

(A1)

W represents SO<sub>2</sub>

Z and Z' are independently selected from hydrogen, a hydroxyl group and an -OR protected hydroxyl group, where R is a hydroxyl protective group;

$R_1$ ,  $R_2$  and  $R_3$  are independently selected from hydrogen, halogen, a hydroxyl group, an -OR protected hydroxyl group, wherein R is a hydroxyl protective group,  $C_1$ - $C_6$  alkyl or  $C_1$ - $C_6$  alkenyl, optionally substituted with halogen, hydroxyl, cyano or amino, or a dialkyl( $C_1$ - $C_3$ )ether or alkyl( $C_1$ - $C_3$ )amino group.

Group II, claims 1-2,4-6,8-22 are drawn to the following compounds of formula (I), the process of making them and their use as disclosed below :

- X represents a halogen atom selected from chlorine, bromine and iodine
- A is selected from any of the moieties corresponding to general formula:

Z and Z' are independently selected from hydrogen, a hydroxyl group and an -OR protected hydroxyl group, where R is a hydroxyl protective group.

$R_1$ ,  $R_2$  and  $R_3$  are independently selected from hydrogen, halogen, a hydroxyl group, an -OR protected hydroxyl group, wherein R is a hydroxyl protective group,  $C_1$ - $C_6$  alkyl or  $C_1$ - $C_6$  alkenyl, optionally substituted with halogen, hydroxyl, cyano or amino, or a dialkyl( $C_1$ - $C_5$ )ether or alkyl( $C_1$ - $C_5$ )amino group.

Group III, claims 1-2,4-6,9-22 are drawn to the following compounds of formula

(I), the process of making them and their use as disclosed below :

- X represents a halogen atom selected from chlorine, bromine and iodine
- A is selected from any of the moieties corresponding to general formula:

(A1)

W represents 4-phenyl- 1,2,4-triazolin-3,5-dione

Z and Z' are independently selected from hydrogen, a hydroxyl group and an -OR protected hydroxyl group, where R is a hydroxyl protective group;

$R_1$ ,  $R_2$  and  $R_3$  are independently selected from hydrogen, halogen, a hydroxyl group, an -OR protected hydroxyl group, wherein R is a hydroxyl protective group,  $C_1$ - $C_6$  alkyl or  $C_1$ - $C_6$  alkenyl, optionally substituted with halogen, hydroxyl, cyano or amino, or a dialkyl( $C_1$ - $C_5$ )ether or alkyl( $C_1$ - $C_5$ )amino group.

Group IV, claims 1-2,4-6,9-22 are drawn to the following compounds of formula, the process of making them and their use (I) as disclosed below :

- X represents a halogen atom selected from chlorine, bromine and iodine
- A is selected from any of the moieties corresponding to general formula:

(A1)

W represents phthalazin-1,4-dione.

Z and Z' are independently selected from hydrogen, a hydroxyl group and an -OR protected hydroxyl group, where R is a hydroxyl protective group;

R<sub>1</sub>, R<sub>2</sub> and R<sub>3</sub> are independently selected from hydrogen, halogen, a hydroxyl group, an -OR protected hydroxyl group, wherein R is a hydroxyl protective group, C<sub>1</sub>-C<sub>6</sub> alkyl or C<sub>1</sub>-C<sub>6</sub> alkenyl, optionally substituted with halogen, hydroxyl, cyano or amino, or a dialkyl(C<sub>1</sub>-C<sub>3</sub>)ether or alkyl(C<sub>1</sub>-C<sub>3</sub>)amino group.

I. The inventions listed as Groups do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

the international application shall relate to one invention only or to a group of inventions so linked as to form a single general inventive concept (" requirement of unity of invention ").

PCT Rule 13.2 states " Where a group of inventions is claimed in one and the same international application, the requirement of unity of invention referred to in Rule 13.1 shall be fulfilled only when there is a technical relationship among those inventions involving one or more of the same or corresponding special technical features. The expression " special technical features" shall mean those technical features that define a contribution which each of the claimed inventions, considered as a whole, makes over the prior art.

In the instant case, the invention of Group I is directed to  
the side chain group - A is selected from any of the moieties corresponding to general formula:

(A1)

W represents SO<sub>2</sub>

, whereas the invention II is related to the side chain

group - X represents a halogen atom selected from chlorine, bromine and iodine

- A is selected from any of the moieties corresponding to general formula:

The bicyclic ring containing SO<sub>2</sub> group in Group I has a different chemical structure from the cyclohexyl radical group with substituents in Group II; because of the difference between their corresponding chemical structures, each will exhibit a chemically different activity respectively. Each invention has a different use and effect due to the unrelated substituent attached to the core of the compounds. Therefore, there is no special technical feature required in Group II. There is no single general inventive concept and no unity of invention for the method or the processes as defined in 37 CFR 1.475.

In the instant case, the invention of Group I is directed to the side chain group - A is selected from any of the moieties corresponding to general formula:

W represents  $\text{SO}_2$ , whereas the invention III is related to the side chain

group - X represents a halogen atom selected from chlorine, bromine and iodine

- A is selected from any of the moieties corresponding to general formula:

(A1)

W represents 4-phenyl- 1,2,4-triazolin-3,5-dione

The bicyclic ring containing  $\text{SO}_2$  group in Group I has a different chemical structure from the 4-phenyl-1,2,4-triazolin-3,5-dione in Group III; because of the difference between their corresponding chemical structures, each will exhibit a chemically different activity respectively. Each invention has a different use and effect due to the unrelated substituent attached to the core of the compounds. Therefore, there is no special technical feature required in Group III. There is no single general inventive concept and no unity of invention for the method or the processes as defined in 37 CFR 1.475.

In the instant case, the invention of Group I is directed to the side chain group - A is selected from any of the moieties corresponding to general formula:

W represents  $\text{SO}_2$ , whereas the invention IV is related to the side chain

group - X represents a halogen atom selected from chlorine, bromine and iodine

- A is selected from any of the moieties corresponding to general formula:

W represents phthalazin-1,4-dione.

The bicyclical ring containing  $\text{SO}_2$  group in Group I has a different chemical structure from the 4-phenyl-1,2,4-triazolin-3,5-dione in Group IV; because of the difference between their corresponding chemical structures, each will exhibit a chemically different activity respectively. Each invention has a different use and effect due to the unrelated substituent attached to the core of the compounds. Therefore, there is no special technical feature required in Group IV. There is no single general inventive concept and no unity of invention for the method or the processes as defined in 37 CFR 1.475.

37 CFR 1.475 states that a national stage application containing claims to different categories of invention will be considered to have unity of invention if the claims are drawn only to one of the following combination of categories:

- a. A product and a process specially adapted for the manufacture of said product;  
or
- b. A product and a process of use of said product; or
- c. A product, a process specially adapted for the manufacture of the said product, and a use of the said product; or
- d. A process and an apparatus or means specially designed for carrying out the said process; or
- e. A product, a process specially adapted for the manufacture of the said product, and an apparatus or means specially designed for carrying out the said process.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

II. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Taylor Victor Oh whose telephone number is 571-272-0689. The examiner can normally be reached on 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Janet Andres can be reached on 571-272-0867. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
